Widespin™ 1550 Broadcast Topdresser The Best Spread in the Industry.

The Turfco Edge: The Innovation Continues

The *Turfco Edge* started with listening to what frustrates superintendents when it comes to topdressing. We heard they were tired of doing wheel-to-wheel spreads, overlapping spreads, dealing with complicated mechanical adjustments, and wasting time checking in with their crews to verify spread settings.

The **Widespin™ 1550** solves these problems, and more. Calculating and knowing your rates is easier. Adjusting settings is easier. Saving preferred settings is easier. Loading is easier. Topdressing greens, approaches and tees at the same time is easier. And getting the exact spread you want, every time, is easier.

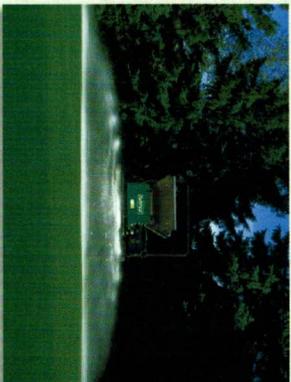

Widespin 1550 topdressers are available in truck-mounted and tow-behind models with engine or hydraulic power options. You can choose between electronic control or upgrade to our patented digital smart controller. Electronic control models are easy to use and offer good value for the money. Smart controller models offer rate calculation and eight programmable presets for greatest productivity and labor savings.

Larger hopper increases capacity up to 20% and makes loading even easier with the widest hopper in the industry.

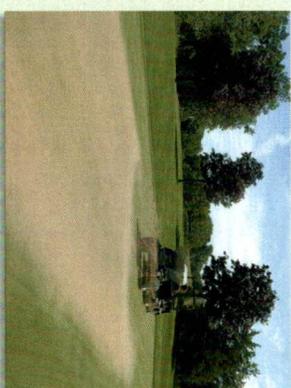

Adjustable spinner angled down for better turf penetration.

Ultra-light spread application.

Medium spread application.

Heavy spread application.

WideSpin™ 1550 Broadcast Topdresser #1 Brand of Topdressers*

Raising Your Game

We designed the WideSpin 1550 to help you achieve your agronomic goals, increase your staff productivity, and free up your time. With the labor challenges facing the industry, a superintendent's job has never been harder. Now you don't have to compromise your topdressing program. With Turfco's patented hydraulic system and spinner design, along with our smart controller, you can be confident you're getting the application you want every time.

Smart Controller with 8 Presets

Application Calculator Screen

Upgraded Control Makes You More Productive

Having to reset your applications each time you go out is a thing of the past. Now you can save up to eight different presets with upgraded smart control. You can preset different applications for greens, tees, and approaches. Customize your rates by season and set different widths, but keep the same rate. Get more productive, eliminate guesswork, and free up your time with the WideSpin 1550.

- Get the exact spread you want as you move from greens to approaches to tees, at the push of a button.
- On-board calculator lets you know your application rates, calculate the rates you want, input speeds, and determine how much material you need to budget.
- Reduce the number of passes and decrease traffic on your greens with WideSpin 1550 edge-to-edge applications.
- Drive topdressing down into the turf canopy by adjusting the spinner angle, minimizing the need for brushing and eliminating variations in moisture content (wet or dry).
- Refill the hopper faster and with less spillage — galvanized hopper has 20% greater capacity and wider opening fits an 80" bucket.

Truck-mounted option designed to fit all major turf vehicles.

Hydraulic and spinner design makes the patented WideSpin technology even more versatile while delivering a consistent, even spread.
