The City of Douglas has contracted Wild Wood Tree Services, and will be trimming, and/or removing "Parkway Trees".

Parkway trees are trees, generally located in the area between the sidewalk and curb. Per city ordinance, it states that the responsibility for maintenance of these areas lies upon the adjacent property owners/residents.

The City of Douglas has established a hazardous tree mitigation program, to potentially run the course of the next three years, to cover the cost of this action to help reduce some of the potential risk for accidents or injury. It is impossible to determine the failure of a tree, as a healthy tree, by appearance, can unexpectedly pose a hazard. It is our goal to reduce some of the risk and maintain a healthy tree canopy for our community, and the future of our community.

If you have noticed a red mark on a tree, it means; that tree has been selected for removal. We will be working in quadrants and will be marking the trees as work progresses.

Trees offer so many beneficial factors to our environment. We hope you will consider our cost share 50/50 replant program. More information is available on the City of Douglas' web site, regarding this program, or you may contact the Parks Dept. with any questions.
